Federal Definition: Human Trafficking

The Trafficking Victims Protection Act of 2000 (TVPA) defines “severe forms of human trafficking” as: The recruitment, harboring, transportation, provision, or obtaining of a person for:

- sex trafficking in which a commercial sex act is induced by force, fraud, or coercion*, or in which the person induced to perform such act has not attained 18 years of age; or
- labor or services, through the use of force, fraud, or coercion for the purpose of subjection to involuntary servitude, peonage, debt bondage, or slavery.

*Coercion includes threats of physical or psychological harm to children and/or their families. Any child (under the age of 18) engaged in commercial sex is a victim of trafficking.
Attempts to Measure Prevalence

- 14,500 - 17,500 – Number of foreign nationals trafficked into the United States every year.

- Most commonly used estimate of CSEC is Estes and Weiner (2001). Concluded that about 326,000 children were “at risk for commercial sexual exploitation.”

- Edwards, Iritani, and Hallfors (2005), which found that 3.5% (n=465) of an AddHealth sample endorsed an item asking if they had “ever exchanged sex for drugs or money.” The nationally representative sample was comprised of 13,294 youth in grades 8-12 during the year 1996 who completed an in-school questionnaire.

- Zhang (2012) estimated that about 31% of unauthorized Spanish-speaking workers have experienced an incident that meets the legal definition of human trafficking,
IOM Findings (2013)

- Youth vulnerable to CSEC: neglected and abused; in foster care or juvenile detention; homeless, runaways and throwaway youth.

- Over-criminalization of commercially sexually exploited youth.

- More trainings are necessary for LE, CPS workers, medical professionals and other first responders.

- Strengthen existing laws.

- Support multi-sector collaboration.

- Improve data collection and program evaluations.
Urban Institute Study Findings

Underground Commercial Sex Economy (UCSE) Study
Labor Trafficking Study
LGBTQ Youth Study
Estimating the Size and Structure of the Underground Commercial Sex Economy in 8 U.S. Cities
Pimps and sex workers cited many of the same factors influencing their decision to become involved in the UCSE. Pimps described neighborhood influence, family exposure to sex work, lack of job options, and encouragement from a significant other or acquaintance as critical factors in their decision to engage in the UCSE.
Entry Points into the Market

- Family experience: 31.5% (23)
- Neighborhood context: 26.0% (19)
- Drug dealing to pimping: 24.7% (18)
- Recruitment by women: 24.7% (18)
- Mentorship: 17.8% (13)
- Legality in a foreign county: 4.1% (3)
Quote

Family Context
“At age five and six and seven, I seen it because my auntie was a ho. I’ve seen men come and go all the time, didn’t know. One night, I saw and asked. She said, ‘The clothes on your back, the apartment, this is how I pay the rent.’ I had nothing but love for my auntie, that’s what made me fall in love with a working woman. Then my sister and my momma did it. It’s been I the family. My uncle and father were pimps.”
Neighborhood context

“I figure when you look at underground businesses, you should pinpoint the cause and effect that gets into underground business. Not just the business itself, but the trials and tribulations so that the hand is forced into it. To grow up in underprivileged neighborhoods, especially in Black communities, you already have stereotypes around you. You don’t have too much of an option. If you don’t succeed in school, you have the streets or jail”
Different forms of coercion and fraud are used by pimps to recruit, manage and retain control over employees. These forms include feigning romantic interest; emphasizing mutual dependency between pimp and employee; discouraging women from “having sex for free;” and promising material comforts.

Pimps commonly recruit workers from public locations, most often from social circles.
“I believe one of the strong points of this business is manipulation. Say an individual is left wanting. She has aspirations for a bigger future ... A lot has to do with promising”

“I would at first] beat the girls, and then I was trying to get better ways of control ... A lot of the time I would hit one in front of the others, and that’s all it took ‘cause they would be scared enough to stay in line ... The girls didn’t like when I didn’t hit them, they’d think something was wrong.”

“I have smacked a woman before ... But once you get physical with a ho then that means you ran out of game. She beat you mentally and emotionally and so all you have is physical. You ran out of mental games to teach her a lesson. I rarely lay a hand on a woman.”
The widespread availability and rapid expansion of the Internet has redefined the spatial and social limitations of the sex market by introducing new markets for both recruitment and advertisement.

- Online advertisements/classifieds: 49%
- Personal/business websites: 10%
- Social media/discussion boards: 11%
- Stroll: 40%
- Word of mouth and referrals: 40%
- Local newspapers, phonebooks: 23%
- Business cards: 23%
- Establishments: 23%
“Over the years, the Internet became an easier way to get money without having to take so many chances as far as injury or assholes on the outside. You never know what happens at night—a lot of creeps come out. The Internet was a safe haven for everybody. A guy calls and comes to a location where the girl and you are comfortable. Or you go to a location where he gives you an address and you know where to go. It’s modern day.”

SUSPECT CRIMINAL JUSTICE OUTCOMES

- Criminal Network
  - Variation in criminal network sophistication across industries
    - More sophisticated networks associated with H2A/H2B (larger # of victims and suspects per case)
  - 36% attempted and actual sexual abuse (more common in domestic servitude)
  - 23% had weapons (10% attempted murder)
  - Document fraud (17%) and smuggling (14%)

- Criminal Justice Outcomes
  - Arrest information for under half of suspects (49%)
    - DOL fines in only 1 case
  - In 6% of cases suspects not arrested or cases dismissed due to suspect status as a diplomat
CHARACTERISTICS OF RECRUITMENT

- High levels of fraud (93%) and coercion (54%)

- 48% paid recruitment fees (up to $25,000)
  - 36% paid $10,000 and above
  - Average $6,150

- 57% of recruiters involved in other stages

- 54% recruited as a group; 46% individual

- 28% promised less than federal minimum wage

</table>
SURVIVOR ESCAPE EXPERIENCES

- Many came into contact with others while being trafficked – law enforcement, coworkers, neighbors
- Physical barriers, psychological abuse and law enforcement lack of education/training create challenges in escaping
- Victims’ fear of deportation made victims reluctant to contact law enforcement
- Most victims (59%) escaped by running away. However, the support of community members (38%), service providers (21%), friends, family, colleagues (20%) and law enforcement (19%) were also important.
- Low victim self-report to police (7%)
- 14% of victims arrested by police (most commonly for immigration violations)
- Traffickers continued to contact victims after escape and expanded threats and harassment to victims’ families in their home countries
SURVIVOR EXPERIENCES AND SERVICE PROVISION

- Several months or years before properly identified and connected (despite help seeking)
- Majority unauthorized (69%) by time contact specialized service provider
- Some placed into deportation, threatened by immigration officials or placed in detention
- Continued Presence was rarely granted across all sites
- T visa applications successful (but with lack of CP some survivors do not go forward and choose to remain unauthorized)
SURVIVOR NEEDS AND OUTCOMES

- Shelter was the greatest need and challenge
- Acute need to begin working again
- Lack of job training/career readiness -- mired in low-wage work regardless of previous education (sometimes in same industries trafficked)
- Difficulty accessing benefits due to lack of provider knowledge or state laws – often tied to location of service provision/criminal case
- Civil damages and criminal restitution rarely awarded
- Longer-term access to mental health
- Adjustment of status to permanent resident may not be covered/concern about long-term ability to remain in the US
- Family reunification and/or ability to travel/see family
Surviving the Streets of New York: Experiences of LGBTQ Youth, YMSM, YWSW Engaged in Survival Sex
Sample Characteristics: Birthplace

• 2 in 3 youth were born (63%) and/or raised (65%) in New York City.

• Approximately 3 in 4 respondents were born and/or raised in the tri-state area of New York City, New Jersey and Connecticut.
- Half identified as male, one-third as female
- 11% identified as transgender female, 3% identified as transgender male

*Includes queer/questioning, androgynous, femme, gender non-conforming, and genderless
**Sexual Orientation**

- 38% identified as gay or lesbian
- 13% identified as straight
- 37% identified as bisexual

*Includes open, pansexual, no preference, and no label*
• Majority of youth were people of color
• 39% identified as Black/African-American
• 17% as Hispanic/Latino
• 33% with more than one race and/or ethnicity (most commonly Black and Latino)
Age First Engaged in Survival Sex

- Average age was 17 years old
- Most youth were 15 to 18; full range was 7 to 22
How First Engaged in Survival Sex

- Friends or peers: 42%
- Someone approached me: 24%
- Own initiative: 18%
- Exploiter: 6%
- Family: 4%
- Peer facilitator: 1%
- Other: 2%
- Given something, not free: 3%
What Do You Receive In Exchange for a Sexual Act

- **Money**: 88%
- **Shelter**: 29%
- **Food**: 19%
- **Drugs**: 13%
- **Alcohol/cigarettes**: 4%
- **Transportation**: 3%
- **Protection**: 1%
- **Other**: 9%

* e.g., Metrocard, bus fare
** e.g., jewelry, gifts
Situations Involving an Exploiter

14.5% of youth had been in an exploitative situation involving a trafficker

(evidence of force, fraud and coercion)
Desire to Stop Engaging in Survival Sex

- 67% of youth reported wanting to stop at some point or immediately (5%)
- 21% said they had already stopped
- 7% said they had no desire to stop
Complexities

There are many positive things about trading sex. You can trade sex for the life of your kids, you can trade sex to keep your apartment, you can trade sex to feed yourself…Some people think that the sex trade is the worst thing you to do cause your selling yourself…but when it boils down to it, if you have no food in your stomach, if you have no transportation, but you have a man in your face willing to give you money for a half hour, you put your pride to the side, you throw everything out the window and you forget who you are and you forget what you’re doing and you learn to be someone else.

19 years old, Latino, gay, male
Finding

Youth are extremely resilient in the face of external challenges (violence, lack of housing and employment, etc.) and internal challenges (emotional and physical trauma, gender and sexual identity issues).

They find ways to survive, often relying on their informal networks, street savvy, and quick learning abilities to share resources and skills and to adapt to difficult and often dangerous situations.
