

## Video Observation #2

We will observe a video that is an excerpt of a 37-minute bullying episode observed on a school playground. The boy who is being constantly victimized is himself aggressive. He was identified as “rejected” by his classmates – no one wants to be with him. What starts out as rough-and-tumble play quickly accelerates into aggression. Note the behaviors of the main attackers. Observe the peers, too. In what ways do the peers contribute to the aggressive episode?

Role	Response
<b>What can peers do when they observe this type of aggression?</b>	
Peer Group	
<b>What do you think adults should do (think about both dealing with this problem and preventing similar episodes in the future)?</b>	
Teacher who sees it first	
Principal	
Parents of students involved	
Counselor, Sp. Ed. Teacher, Social Worker, Advisor, Others?	

**Adults need students as partners. How can students help in “Putting the Brakes on Bullying” at school?**
